Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-7 are objected to because of use of inconsistent terminology. The claims should be amended to use consistent term. Appropriate correction is required.

The following is a list of objected to recitations and suggestions for correction:

- a. Claim 1, lines 6-7, "said lower end", no lower end has been recited;
- b. Claim 1 line 10, "an inner" should be an inner end;
- c. Claim 1 line 33, "said upper end" should be said free end;
- d. Claim 1, line 33, "said boom" should be said boom member;
- e. Claim 1, line 35, "said boom" should be said boom member;
- f. Claim 2, line 1, "said sleeve member" should be said mounting sleeve;
- g. Claim 3, line 2, "said sleeve member" should be said mounting sleeve;
- h. Claim 3, line 3, "of cartridge" should be of said cartridge;
- i. Claim 4, line 2, "said upper end" should be an other end, or the other end should be positively recited elsewhere;
- j. Claim 4, lines 2-3, "said boom" should be said boom member;
- k. Claim 5, line 2, "said sleeve member" should be said mounting sleeve;
- l. Claim 6 line 3, "said upper end" should be said free end;
- m. Claim 6, line 4, "said boom" should be said boom member;
- n. Claim 7, lines 8-9, "a raised position" should be an extended position to be consistent with later recitations regarding the piston;

Art Unit: 3617

- o. Claim 7, lines 14-15, "said lowered position" should be said retracted position to be consistent with later recitations regarding the piston;
- p. Claim 7, lines 15, "said raised position" should be said extended position to be consistent with later recitations regarding the piston.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites the limitation "said casing member" in line 30. There is insufficient antecedent basis for this limitation in the claim. There is no mention of a casing member in the specification. Claims 2-6 depend from claim 1.

5. Claim 2 recites the limitation "said fastener means" in line 1. There is insufficient antecedent basis for this limitation in the claim. Some fasteners are mentioned in the specification, but it is not readily ascertainable what the scope of this recitation is even from the specification.

6. Claim 5 recites the limitation "said casing member" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

7. Claim 7 is allowed.

Art Unit: 3617

8. Claims 1-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

9. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest the recited combinations as a whole and specifically the handle and piston relationship that raises and lowers and rotates the boom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rupp shows an outrigger where a handle controls rotation. Frick shows an outrigger with hydraulic control of both tilt and rotation. Messik shows an outrigger with hydraulic control. Slatter ('196) shows an outrigger. Jordan, III shows an outrigger with a handle that controls rotation. Roy shows an outrigger with hydraulic control. Slatter ('745) shows an outrigger with a handle that controls rotation.
